PROFESSIONAL SUMMARY

Product Manager with 3+ years of experience driving products across fintech, mobility, and consumer tech. Proven expertise in 0 →1 execution, product strategy, and data-driven decision making. Skilled at designing partner ecosystems, borrower engagement platforms, and compliance-aligned workflows. Strong background in analytics, with hands-on ability in SQL, user research, and KPI definition. Track record of improving efficiency, reducing costs, and driving adoption at scale through user-centric product design.

PERSONAL PROJECTS

CardWise AI | Product Manager & Builder | 2026

- Conceived and built CardWise AI, a fintech web application that helps users identify the optimal credit card for a transaction based on reward rates, cashback benefits, and spend categories.
- Led the end-to-end product lifecycle including problem discovery, PRD creation, user journeys, Figma wireframing, technical architecture, MVP development, and deployment.
- Built a working recommendation engine that evaluates multiple cards, calculates expected reward value by transaction category, ranks cards, and surfaces the highest-value recommendation.
- Developed the MVP using Next.js, TypeScript, Tailwind CSS and deployed it publicly on Vercel.

Collection Insights AI | Product Manager & Builder | 2026

- Built an AI-powered collections analytics platform that helps lenders and collections teams identify repayment trends, collection performance, and delinquency risks through natural language insights.
- Defined product requirements, user journeys, KPI framework, dashboards, and AI-driven workflows to simplify collections monitoring and decision-making.
- Designed conversational analytics capabilities enabling users to ask questions in plain English and receive actionable insights on collections efficiency, agent performance, repayment behavior, and portfolio health.
- Built and deployed a working MVP integrating analytics, visualization, and AI-generated recommendations to demonstrate how modern AI copilots can augment collections operations.
